YES NO Target Start: 1/19/11

Description of Proposed Work (explain detail of work as well as where in facility):

Asbestos documentation from 2002 indicates asbestos floor tile & mastic cleanup, it is vague as to exactly where the clean-up took place. I think it would be prudent to have the areas in this building assessed prior to any future academy training being conducted in this building. My suggestion would be to have the ALMP perform an inspection and assessment of the asbestos in this facility. I will be available to meet the inspector on site at the time of the inspection.

Have job order opened to ALMP for labor costs using department 511; program element # 51121; revenue acct 79275. The following accounting #s are for laboratory, abatement, and/or other NPE. Request estimate if needed.

Accounting Numbers:

<u>1912180013</u>	<u>100000</u>	<u>512159</u>	<u>210000 70</u>
Cost Center	Fund	G/L #	Internal Order

I have the authority to authorize ALMP to bill hourly inspection labor and laboratory expenses to the accounting numbers above for work related to this project.

Records/Inspection Information

Impact on Project

I recommend using our "as needed" abatement contractor to remove affected tiles in the areas occupied by the trainees. Please refer to memo 1436 for the proposed scope of work.

TO: Dennis Brand, Facility Maintenance Office, Fire-Rescue Department, Logistics

FROM: Wm. Brad Blondet, Asbestos & Lead Program Inspector
via Alan J. Johanns, Asbestos & Lead Program Manager, Environmental Services
Department, Energy, Sustainability, and Environmental Protection Division

SUBJECT: Fire Academy Training Building, NTC #88 Kincaid Road, San Diego, CA

Per your request, on January 06, 2011, the Asbestos and Lead Management Program (ALMP) performed an assessment/inspection of the Fire Academy Training Building located at NTC Bldg. #88 Kincaid Road. Details of the assessment/inspection are as follows:

Asbestos containing 9"x 9" Floor Tile was found to be disturbed in areas where training takes place. Visible loose debris was seen in the areas where training takes place and in the areas adjacent to the entries of those areas. Loose and broken tiles were observed in various areas where training takes place. The affected material is in poor condition.

ALMP recommends using our "as-needed" asbestos abatement contractor for cleaning and removal of the affected tiles in the areas that will be occupied by academy trainees. The abatement contractor will be asked to provide a labor and material cost proposal for the following scope of work:

- 1) HEPA vacuuming and tile debris pick-up located in three areas totaling approximately 21,000 square feet of floor space. These areas will include the 2nd and 3rd floor spaces at the middle wing of the building, and the 1st floor area of the North wing of the building (including the entry areas).
- 2) Removal of loose and broken tiles using a mini-enclosure in the same areas mentioned above (approx. 400 square feet).
- 3) Cost for disposal of asbestos waste.
- 4) Optional cost to provide floor leveling compounds in areas of removal in order to arrest damage of tiles to remain in place.

January 07, 2011

ALMP will schedule a job walk which will include the representative of our "as-needed" abatement contractor.

If you have any questions please contact me at 858-492-5086 or WBlondet@sandiego.gov

Sincerely,

Wm. Brad Blondet
ALMP Inspector
